*Two additional features exceed  
your expectation*

- **Cable GPS**
- **eXtreme Sports Mode**

# *Cable GPS*

**A wired GPS way connecting to  
Laptop by USB connectivity**

# What is eXtreme Sports Mode

**eXtreme Sports Mode stands for  
a situation when you adjust  
BT-Q818 eXtreme to a 5Hz  
update rate receiver**

## *What is update rate?*

**Update Rate means the rate of GPS seeking for satellite signals.**

- **1Hz stands for GPS seeking for satellite signals 1 time per second.**
- **5Hz stands for GPS seeking for satellite signals 5 time per second.**

## *Why should I use it?*

- The position update with 5hz BT-Q818 eXtreme will be more accurate compared to 1hz BT-Q818 eXtreme at high speed which can reduce display delay and navigation errors on curvy routes.
- It doesn't consume more power at all.

## *When should I use it?*

**The eXtreme Sports Mode can be used by:**

- **Road racers**
- **Autocrossers**
- **Circle track racers**
- **Motorcycles**
- **Boats**
- **Aviation**

## *How to use it?*

- The Driver CD accompanies a small Utility Tool which allows further adjustment toward BT-Q818 eXtreme via USB
